

GIS Analyst

About Meristem

Meristem Insights is a company focussed on providing intelligent decision and management support across the natural resources sector. A meristem is undifferentiated plant tissue that can produce new parts of the plant. It can become any type of plant tissue: leaf, stem, flower, petal, etc. Like a meristem, we are ready to grow and adapt to the circumstances presented to us. We pledge to help our clients grow and provide them what they need to adapt to their ever-evolving circumstances.

Position Overview

We are seeking creative and skilled GIS Analysts to join our team. As a GIS Analyst, you specialize in evaluating data sets, writing code and cartography. Success in this role will be demonstrated by providing support and expertise in the development of Meristem's GIS capabilities to meet strategic objectives. Your GIS proficiency will be instrumental in establishing Meristem Insights Ltd. as a leading provider of Geospatial services.

Responsibilities:

- 1. Data Management:** Create and maintain spatial and tabular information using a variety of software platforms.
- 2. GIS Analysis:** Perform spatial analysis and geo-processing tasks to support our clients and the Meristem team.
- 3. ESRI Mobile Support:** Support Mobile Mapping projects by using Web Mapping, Survey 123 Forms, Field Maps and Dashboards
- 4. LRM Support:** Deliver LRM support to clients around the world. This includes Oracle and /or SQL Server database maintenance, writing info types, responding to client tickets, training clients to use LRM efficiently and effectively, and providing configuration and integration services with other software.
- 5. Mapping and Communication:** Conduct spatial data editing and maintenance. Create maps and graphical materials for reporting, presentations and client relations.
- 6. Tool and Script Development:** Scripting and automation of GIS tasks.
- 7. Collaboration:** Work with other analysts and the broader Meristem team to ensure that every product we deliver to a client uses the best available expertise that Meristem has to offer.

Qualifications:

- Bachelor's degree in Forestry, Environmental Science, Geography, Natural Resource Management, or a related field.
- Certificate or Diploma in GIS
- 2-5 years of related GIS experience
- Proficiency with GIS programming and scripting languages
- Proven experience in forestry data management and analysis
- Passion and aptitude for applying technology and solving problems
- Attention to detail and strong work ethic
- Excellent communication and presentation skills.
- Ability to work independently and as part of a team, managing multiple tasks and meeting deadlines.

Working at Meristem Insights

At Meristem Insights, we provide a challenging and rewarding work environment, focused on building a strong and dedicated team of natural resource professionals. We are a growing company, with the view that we succeed through the success of our team. As such, we will support your professional growth and provide opportunities for advancement, based on your individual interests and strengths.

You will receive a competitive salary consistent with your experience and expertise, with room for advancement as you succeed in your role and continue to take on new responsibilities. We provide a full benefits package and flexible work environment that allows our team members to excel in their professional life, while accommodating their personal life.

Application

Please submit a resume and cover letter to Jay Greenfield at careers@meristeminsights.ca with "GIS Analyst" in the subject line of the email. Meristem Insights is an equal opportunity employer. For any candidates requiring accommodation, please contact our People Department at careers@meristeminsights.ca.

We thank you in advance for your submission. All resumes will be reviewed and only those selected will be contacted.
